

Frameless shower doors are widely recognized as the finest product of their kind. Their remarkably sturdy, low-profile design results in a beautiful, clean and uncluttered look.

- **Ultra Tight Tolerances**
- Our glass gap spacing is the tightest in the industry, in most cases, creating a virtually leak-proof seal without gaskets.
- **Durable Precision Machined Brass Hardware**
- Oasis frameless glass enclosures employ only the highest quality materials to ensure long-term, dependable, and trouble-free service.
- **Shower Door Hinge Integration**
- Shower Doors are notched where hinges attach for added security, strength, and safety.
- **Multiple Hardware Styles**
- A wide range of materials and finishes are offered to complement your individual taste or to match your existing bathroom fixtures.
- **Superb Glass Selection**
- Standard 3/8" or optional 1/2" glass is available in clear or any of many tints and privacy options.

TECHNICAL FEATURES

- **Sweeps.** Durable polycarbonate sweep is nearly invisible because of its low profile and translucent color.
- **Hinges.** Five degree offset pressure hinges close doors with precision and open easily in either direction.
- **Headers.** One of the lowest profile headers in the industry anchors to the wall with concealed fasteners.
- **Anchors.** Ninety degree metal anchor system stabilizes panel flex. Low profile metal clips and channels minimize hardware profiles.
- **Ultra tight fit** between door and panel allows door to swing both ways while still providing a shower tight seal.
